

Options - Opties

Kreon ceilings are designed to match the requirements of any room function, achieved by the large variety of integrated products and their aesthetic design possibilities. Colour and perforation can be chosen to suit the room, in order to enhance its architecture and sound performances. Some luminaire modules offer a choice of ballasts to suit the required lighting control system, or allow for the integration of an emergency lighting system. The table below contains all options available for ordering. The table on the following page provides a list of accessories available for each model.

Het gebruik van een Kreon plafond geeft u de mogelijkheid om uw plafond volledig af te stemmen in functie van uw ruimte. Niet alleen door het groot aantal toepassingen die geïntegreerd kunnen worden, maar ook de vormgeving ervan. Kleur en perforatie kunnen in functie van het interieur gekozen worden zodat de architectuur en geluids performantie nog beter tot hun recht komen. In sommige toestellen kan ook de VSA in functie van uw lichtsturingssysteem gekozen worden of kan er een noodverlichtingmodule geïntegreerd worden. Onderstaande tabel geeft alle keuzemogelijkheden weer. De tabel op de volgende pagina geeft aan welke opties er bij een toestel gekozen kunnen worden.
