Onn-Wall 165
Onn-Wall 300

Distinctive signs for architectural basic element

About

The new Onn-Wall luminaires benefit from the photometric advantages of the latest TIR lenses. Onn-Wall with a “forward throw” light distribution eliminates the tradition hot spot on the wall surface and creates a homogeneous light distribution on the ceiling.

Features

- 100% forward throw light distribution without hotspot on wall (thanks to an anti-reflective coating)
- Unique TIR lenses (total internal reflection)
- Easy installation
- Sharp edged housing
- Standard DALI
- Integrated driver

Application

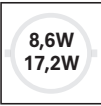

- Multiple application options eg. wallwasher, ceiling washer, ...
- Excellent tool to create homegenous light distribution on the ceiling or wall.

Models

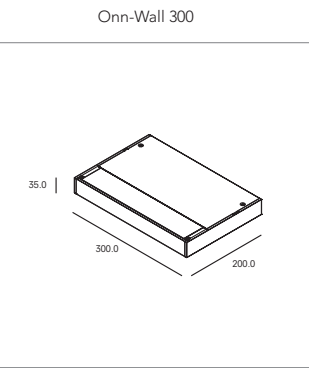

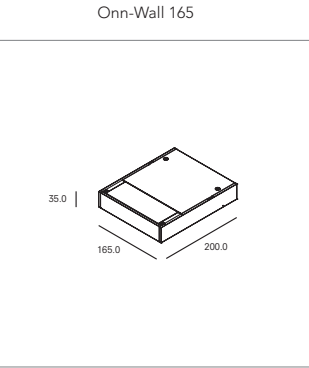

- Onn-Wall 165
- Onn-Wall 300

Finishing

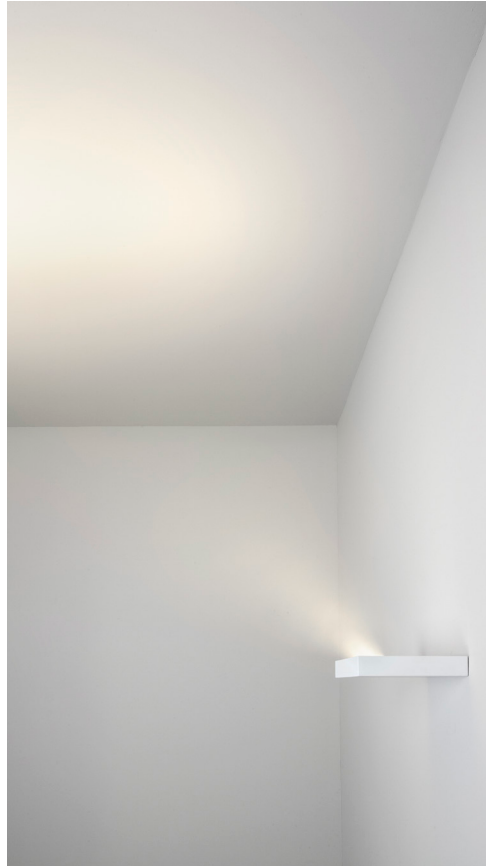

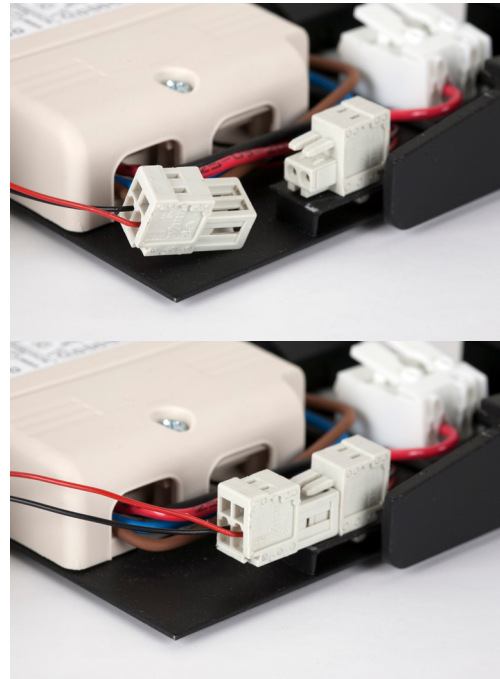

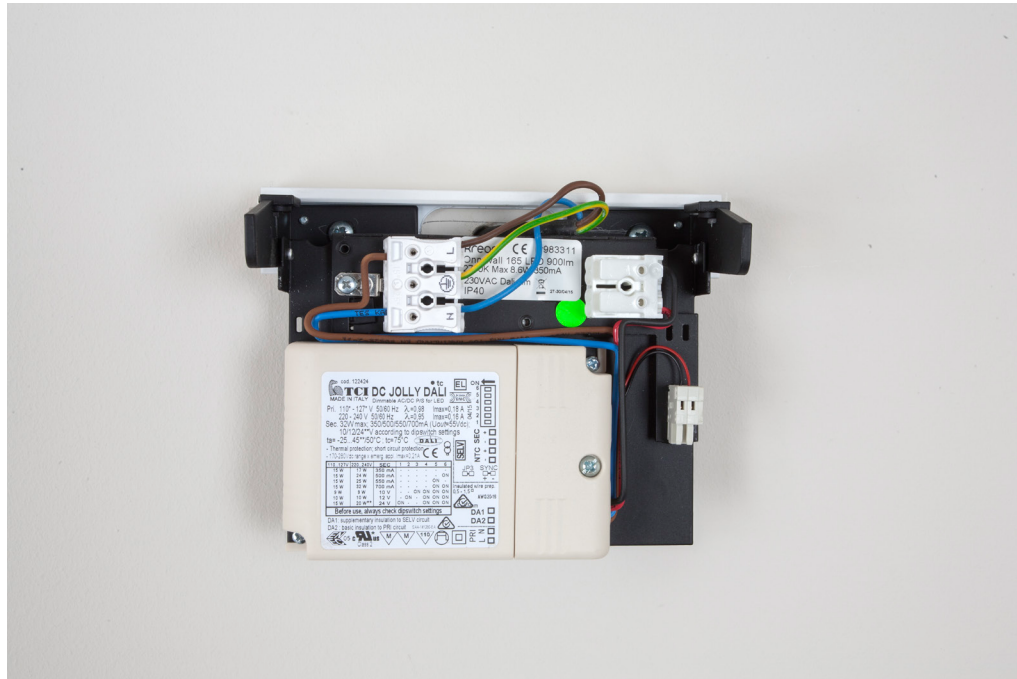

Onn-Wall

Onn-Wall 165 and 300 are Kreon's new wall mounted luminaires, specifically designed to light ceilings directly with a pleasant, ambient diffused light.

Stripped bare of superfluous detail, the installation is entirely in keeping with Kreon's 'purity in light' philosophy. The luminaire has been created from the purest of forms to provide an optimal complement to the design aesthetic of modern minimalist architecture. As with all of Kreon's luminaires, Onn-Wall is distinct and pure in style and form and simply just looks superb.

Developed so ingeniously and with such attention to detail and quality, they effortlessly surpass the lighting performance of any other wall mounted luminaire.
