

Policy statement

kreon NV designs, develops, produces and supplies top-quality sustainable lighting solutions and ceiling systems. Both combine aesthetic appeal and functionality.

kreon NV lighting and ceiling systems comply with applicable standards and are made using a conscious choice of sustainable and recyclable materials.

kreon NV is committed to customer focus, a healthy and safe workplace, and environmentally friendly materials and processes.

Customer focus translates into creating maximum added value for customers by developing and optimising products and solutions that meet customer and environmental needs and requirements. kreon NV supports its customers in their search for technical and sustainable solutions: "peace of mind – from design to installation". Timeless design and a long-term approach to product development go hand in hand.

kreon NV is committed to applicable quality, safety and environmental laws and regulations.

As part of sustainable business practices, kreon NV makes safe and healthy working conditions its top priority. kreon NV protects the environment and future generations by avoiding pollution, minimising emissions and opting for sustainable materials and processes.

kreon NV aims to be CO₂-neutral by 2030. kreon NV follows this contribution to reducing its environmental impact by monitoring its carbon footprint.

kreon NV also sets out to link sustainability to the personal comfort and well-being of its employees.

This commitment to the continuous improvement of quality and environmental performance and corporate sustainability is supported by the use of an integrated management system (IMS).
