removal tool for up

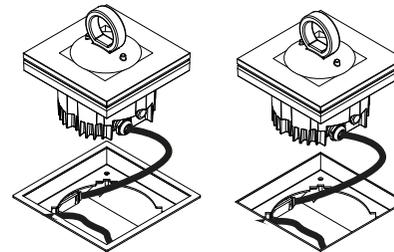

KR752110

1. removal of up 165

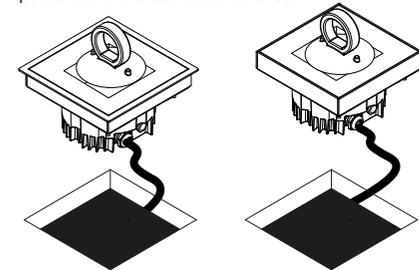

in order to the the up out of the floor:
place the suction cup on the glass and
pull the fixture out
(technique is the same for circular and square
up)

if installaed in a matchbox, only the product
itself, without the finishing frame will be
pulled out

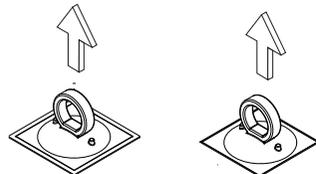

when installed in a hollow floor (no matchbox)
the product plus the finishing frame will be
pulled out of the cut-out all at once

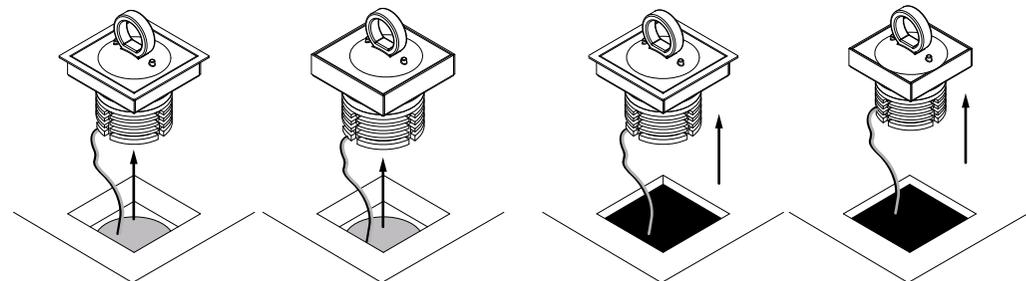

2. removal of up 80

in order to the the up out of the floor:
place the suction cup on the glass and
pull the fixture out
(technique is the same for circular and square
up) PULL PULL

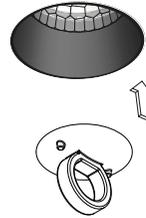

regardless of the installation (matchbox or hollow floor),
the fixture will always be pulled out as a whole: finishing frame
included

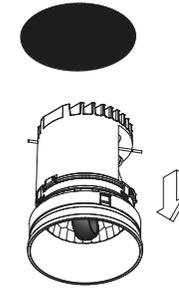

kreon installation manual
