technics		Name	Reference
		cable suspension	k763102
1	specifications	cable suspension	
			
			
remove the big bolts and release the small ones for 3/4 of their length.			
			
slide the bolts in the keyholes that are mounted in the profile do this on both sides of the coupler			
			
fix the small hexagon bolts			
			
use the 4 hexagon bolts to fix the coupler to the profile			
2	installation		
			
slide in keyhole slot to fix against ceiling			
			
adjust the height of the cadre by pulling the strands (or release them) on both sides			
			
to make the cadre shorter: pull the strand by pulling the strand, the cable will shorten and pull the down part of the cadre up			
			
to make the cadre longer: push the button that is coming out of the suspension and pull the cable downward, the down part of the cadre will drop			
installation			

when the cadre is at the preferred height, smoothen the feeder cable.
when it is tight, fasten the cable clamp so the cable stays fixed

installation

do this on both ends of the cable
