1. light source information

light source containing product

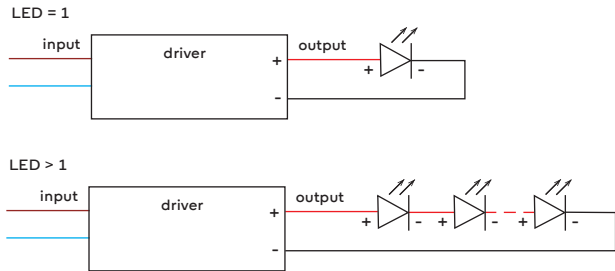

The light source contained in this luminaire shall only be replaced by the manufacturer or his service agent or a similar qualified person.

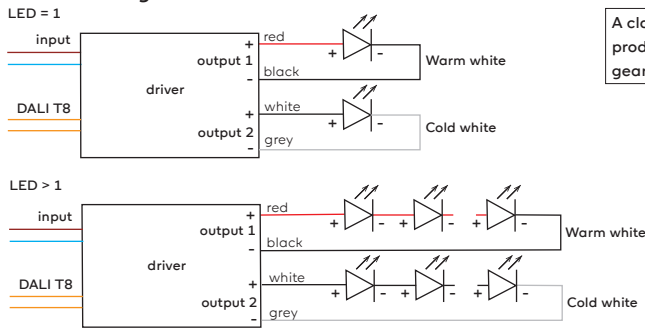

Energy Efficiency Class and EPREL-information for each specific LED/fixture can be found on the last page of this manual

2. installation

electrical diagram

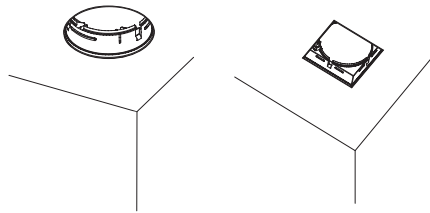

electrical diagram TW

A class III-product or a string of these products in series, can only be used with a gear where $U_{out} \leq 120VDC$!

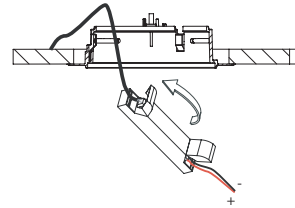

kreon installation manual

3. installation

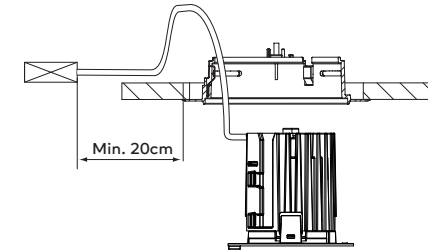

To install the plasterkit. See installation manual KR8170001755 or KR8170001758.

Please make sure that main voltage is disconnected before proceeding!

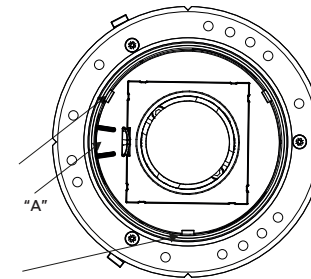

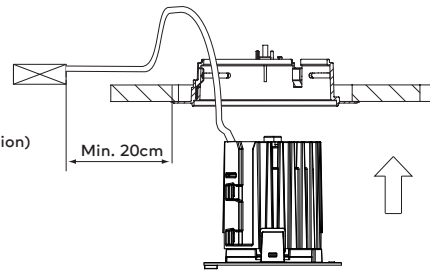

Install the correct gear with strain relief on the hollow ceiling.

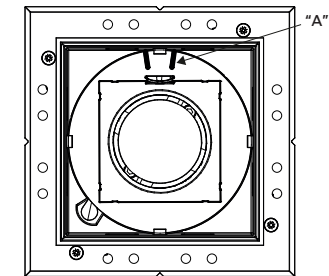

Important: always check the polarity!!
+ = red wire
- = black wire

4. installation

Put the LED assembly in the plasterkit, together with the ring (in case of Fixed version)

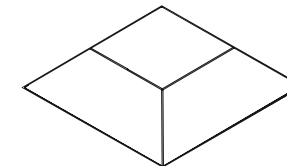

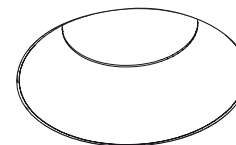

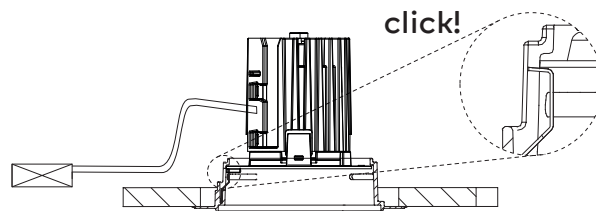

With a round plaster kit, place the ribs "A" between the springs to allow the reflector to rotate for orienting the flower pattern.

In case of a square plasterkit place ribs "A" "around" the spring for aligning the flower pattern with the sides of the louver.

5. installation

To install the louver see manual KR8170001761 or KR8170001762
