create the conditions in which the
beauty of architecture can surface.

kreon #worldofkreon

We want to welcome people into the world of kreon, make them a part of it. We want to create a harmony between comfort and functionality. That is what our new collections consist of. Functional yet comfortable solutions. We step away from classic designs. And we bring back true, unique optics and lenses. Characterized by comfort, connectivity, technology and architecture. Driven by innovation, we try to surprise you and do the unpredictable. To meet everyone's personal needs. So everyone can experience the world of kreon.

belux novelties

kreon aplis 60

kreon aplis 60 is a new range of round shaped recessed downlights with an aperture of 60mm.

Equipped with the newest high performance faceted reflector in a fixed downlight or wallwash luminaire they offer optimal efficiency and uniformity.

kreon aplis in-line 60

kreon aplis in-line directional is a fully recessed spotlight and has a rotational adjustment of 360° and an angular adjustment of 30°, which when combined with the choice of spot, flood and wide flood TIR (total internal reflection) reflector, provides a truly versatile accent lighting tool.

kreon aplis in-line fixed is the perfect solution for general lighting and features a flood beam mirror reflector set above the black or white internal louvre, optimised to create pools of light on horizontal surfaces or dramatic scalloping effects on verticals.

kreon aplis 80 (in-line) high efficiency

kreon aplis 80 (in-line) HE integrates the newest high efficient faceted optics as an extension to the existing kreon aplis 80 directional range.

Combined with a lighting designers preferred LED module it creates high efficient pools of light on horizontal surfaces or dramatic scaloping effects on verticals with excellent colour rendering.

kreon aplis 80 (in-line) HE is 30° adjustable to spotlight every detail in a light scene.

kreon inti

kreon inti is a fully recessed downlight with a refined patented* optical system.

kreon inti fixed downlight has a built-in dome set above a black or white internal louvre. The faceted dome adds a scattering play of brilliance and creates a first layer of ambiance.

kreon inti directional combines the dome effect of the downlight with a decentralized directional spotlight that has an angular adjustment of 30°. The diffused light from the dome neutralizes the shadow of the directional spotlight in the light effect. The directional light creates the second layer of focused light.

kreon side

kreon side reproduces many aspects of the classical recessed side light. The faceted reflectors which are incorporated into the light ensure a uniform asymmetrical beam, making the kreon side in-line an efficient, compact floor or ceiling washer. A soft yet striking light beam and the steep bevel of the finishing louvre draws attention to the straight vertical back surface which can be finished in various materials according to the designer's preference. kreon side in-line, available in widths of 1", 1" 9/16 and 3" 1/8 can be merged perfectly into the architecture and combined with other kreon luminaires.

kreon side in-line

kreon side in-line reproduces many aspects of the classical recessed side light. The faceted reflectors by Bartenbach Lichtlabor which are incorporated into the light ensure a uniform asymmetrical beam, making the kreon side in-line an efficient, compact floor or ceiling washer. A soft yet striking light beam and the steep bevel of the finishing louvre draws attention to the straight vertical back surface which can be finished in various materials according to the designer's preference. kreon side in-line, available in widths of 1", 1" 9/16 and 3" 1/8 can be merged perfectly into the architecture and combined with other kreon luminaires.

kreon stripe

kreon stripe 25 is a truly versatile semi-recessed ceiling and wall luminaire characterised by a compact form hosting a single or double deepset downlight or a single wallwasher.

kreon stripe 25 combines small rhythmic pools of accent lighting with homogeneous wall washing light effects.

kreon up 80 (in-line)

kreon up is a range of floor recessed up lighters characterised by its minimal appearance and optical functionality. The range is offered in two sizes in both square and circular forms, is finished with black or white backed toughened glass with a satin stainless steel trim. LED modules are deep-set within the luminaires and are controlled by a choice of anti-glare louvre for precise uplighting; brightness limiting diffuser for ambient or orientation lighting; and wall wash optic for vertical illuminance. The units are sealed to IP67 and have a die cast aluminium and stainless steel housing to provide protection from the harshest environments.

belux twilight

In a refined way, belux twilight combines unrivalled room and atmospheric lighting. Using a dimmer belux twilight can produce an atmospheric direct emotional play of light or a large amount of light to illuminate the room indirectly as desired.

Inside the artificial glass body there are LED lamps at the top and at the bottom, emitting light towards each other, so that belux twilight turns into a light sculpture. With an additional LED spot belux twilight gives out indirect room lighting via the ceiling. The indirect light and light inside the art glass body can be dimmed independently of one another.

belux twilight 360

belux twilight sophisticatedly combines brilliant room and mood lighting and has been considered a classic floor-standing lamp for over 15 years. The range now features a cylindrical version, which broadens the lamp's range of potential applications in architectural spaces.

belux twilight 360 is available in aluminium and bronze anodized finish. The inner workings of the light fixture feature LED light sources at the top and the bottom, which emit light towards each other and hence produce the belux twilight's characteristic effect. The indirect, high-performance of indirect room lighting. Both light sources can be dimmed independently, enabling endless lighting moods.

Aluminium

Dark Bronze

belux ypsilon

belux ypsilon is a discrete and energy-saving solution to illuminate the walls of rooms and thus visually enlarge it. The plug-in lamp also solves the problem of dark ceilings where they do not reflect light. Modern electronics and its stylish finishes, along with the distinctive design, ensure high-quality illumination and a long operating life.

The built-in dimmer enables the light to be regulated from bright room light to cozy mood light. belux ypsilon is energy saving and can be rotated through 270°.
