

kreon outdoor lighting

The art of building is not merely a collection of concrete and brick structures. It consists of an architectural design set in its unique environment.

Environment and architecture cannot be seen as two different entities, they form a whole, in close interaction with one another.

Therefore, lighting is not merely a matter of indoor settings. The moment the building is shrouded in the darkness of night, outdoor lighting connects the life indoors with the outside world.

kreon luminaires for outdoor use constitute the same detail that can reflect and integrate in architecture within its purest form, as its indoor counterparts. They enhance and add value to their environment. Both indoor and outdoor.

kreon dolma creates a sensuous luminous recess in vertical surfaces and provides ambient and placement lighting. This is achieved by the discrete concealment of LED sources behind flat panels that drift light along the linear profile reflector, tailor made to suit the application.

kreon project downlights

kreon project downlights are the perfect solution for general lighting and offer efficient and eye pleasing comfort. The IP44 rated louvre protects the luminaire for dust and dirt and makes them suitable for use in certain outdoor under canopy applications.

There is a choice for a fixed or directional downlight version each with a choice of 3 possible beam angles. Every luminaire is equipped with a glare snoot to ensure visual comfort and available in circular or square shape.

kreon raga is an exterior bollard luminaire with a simple, timeless form that is complimented by a choice of stone or steel material finishes that define its personality. The units are sealed to IP67 and are fitted with warm LEDs to provide an attractive surrounding glow.

kreon raga horizontal with steel finish has now been upgraded with a high efficient LED module with an asymmetric reflector which ensures that much more light is projected on the floor. This means kreon raga is not just an orientation light, but a high quality floor wash light.

kreon rokko is a semi-recessed luminaire that requires minimal installation depth. kreon rokko produces a soft gradient light and is ideal for pathway and orientation lighting. Whether used indoors or outdoors kreon rokko can generate a formal continuity in architecture from the interior to the exterior.

The kreon side and kreon side in-line concept originated from the need to provide ambient and placement lighting from within vertical surfaces. The faceted reflectors ensure a uniform asymmetrical beam without sharp edges or hotspots. They also provide a wash of light that can provide orientation through spaces. Depending on the way of installation, the luminaire shines either up or down. kreon side for outdoor use, available in widths of 1 1/8" and 3 1/8", can be merged perfectly into the architecture and combined with other kreon luminaires.

kreon up is a range of IP67 rated luminaires characterised by its minimal appearance and optical functionality. The range is offered in three sizes in square or circular, is finished with black or white backed toughened glass with a satin stainless steel trim. LED modules are deep-set within the luminaires and are controlled by a choice of anti-glare louvres for precise uplighting; brightness limiting diffuser for ambient or orientation lighting; wallwash optic for vertical luminance. kreon up 40 is also available as a surface mounted fixed downlight.

kreon up glass

The stunning design of kreon up 80 outdoor glass has been successfully created to marry the soft contours of the glass with a modified version of the existing kreon up 80 outdoor fixture. Light is elegantly distributed through the sculpted glass thanks to the crystal-clear, satined light guide at the top. The range consists of three different styles (circular stub, circular gherkin and circular free-form stub) that can either be combined or used individually. This sculpted yet simple play on form creates a bridge between art and design, between functionality and emotion.

kreon wabi is an IP65 external spotlight. This compact luminaire is available with an LED light source, a 30° beam angle and a colour temperature of either 2700K or 3000K. kreon wabi comes as a single based or bollard mounted spotlight, as a fixed wall light or as a freestanding pillar. The spotlight luminaire head can be rotated 360° and tilted up to 90°. kreon wabi wall and kreon wabi pillar have a fixed asymmetrical beam suitable for guiding illumination.
