F mounting block, lvl 2

kreon kagi is an innovative and extremely versatile modular profile system combining linear and accent lighting.

The basic 24V profile surface mount can optionally be equiped with 16mm or 26mm diameter satinated continuous light tubes for a sustained soft light distribution. An ingenious junction allows a perpendicular, 90° tilted second level connection of the 24V profile.

Round or square shaped spotlights, deco lights and wallwashers can be added by clamping them on the main profiles. It is possible to change the position of the spotlights over the track. kreon kagi is an essential tool for architects and lighting designers that can be used as a graphic play of light or guide light.
